Problem solving, critical thinking, team player, time management

Education

B.Sc., Electronic and Electrical Engineering,
Obafemi Awolowo University
November 2022 | Ile-Ife, Nigeria

West African Senior School Certificate,
O'tega International School
June 2014 | Ibafo, Ogun, Nigeria

Professional Experience

Associate Software Engineer, *Hux Ventures*
August 2022 – present | Lagos, Nigeria

- Led the development of a global course search application built with Django and React.js and integrated Paystack payment for a portfolio company with SlimPHP.
- Developed and managed WordPress sites for various portfolio companies, tailoring each site to meet organization and branding requirements.
- Oversaw Linux server administration and deployment processes across all dev teams, ensuring operational efficiency and overall stability and scalability of applications.

Back-end Developer, *Freelance*
June 2022 – July 2022

- Integrated Stripe payment gateway to enable subscription service for a scheduling app, boosting UX and revenue.
- Developed a secure subscription system using SlimPHP and MySQL, ensuring smooth payment processing and data management.
- Collaborated with cross-functional teams to ensure seamless integration of the subscription service and optimal app functionality.

Back-end Developer, *PlatON Network*
February 2022 – April 2022 | Lagos, Nigeria

- Contributed to developing a Django-based RESTful API for a social network service and improved the front-end team's efficiency with comprehensive documentation.
- Created unit and integration tests, boosting code quality and minimizing debugging time.
- Collaborated with the dev team to integrate RESTful API, enhancing app performance and user experience.

Back-end Developer, *Freelance*
May 2021 – October 2021

- Contributed to the development of the back-end service of a movie rental app using Express.js and MongoDB, enabling seamless user experience and data management.
- Wrote Jest tests to maintain high code quality and optimal performance of the back-end API.
- Ensured smooth integration of the back-end service and the front-end application, enabling optimal app functionality.
